Figure 1 is a line graph illustrating the daily number of COVID-19 cases in the Republic of Serbia from March 1, 2020, to May 1, 2020. The vertical axis (Y-axis) represents the number of cases, ranging from 0 to 1000 in increments of 100. The horizontal axis (X-axis) represents time in days, with labels for March 1, March 15, March 31, April 15, April 30, and May 1. The data points are connected by a solid line, showing a significant peak in cases around March 25, followed by a period of fluctuation and a second, smaller peak around April 10, before a general decline towards May 1.

Day	Number of Cases (approximate)
March 1	0
March 15	100
March 25	900
March 31	400
April 15	200
April 30	100
May 1	50
