Figure 1 is a line graph illustrating the number of cases of COVID-19 in the Republic of Serbia from March 1, 2020, to May 1, 2020. The vertical axis (y-axis) represents the number of cases, ranging from 0 to 1000. The horizontal axis (x-axis) represents time in days, with labels for March 1, April 1, and May 1. The graph shows a sharp increase in cases starting in late March, peaking around April 15 at approximately 900 cases, and then declining to near zero by May 1.
