Figure 1 is a line graph illustrating the daily number of COVID-19 cases in the Republic of Serbia from March 1, 2020, to May 1, 2020. The vertical axis (Y-axis) represents the number of cases, ranging from 0 to 1,000,000. The horizontal axis (X-axis) represents time in days, starting from March 1 and ending on May 1. The graph shows a rapid increase in cases starting in late March, reaching a peak of approximately 800,000 cases in early April, followed by a sharp decline towards May 1, 2020.
