Figure 1 is a line graph illustrating the daily number of COVID-19 cases in the Republic of Serbia from March 1, 2020, to May 1, 2020. The vertical axis (Y-axis) represents the number of cases, with major grid lines every 100 units from 0 to 1000. The horizontal axis (X-axis) represents time in days, with labels for March 1, April 1, and May 1. The data points are connected by a solid line, showing a rapid rise in cases starting in late March, reaching a peak of approximately 900 cases around April 15, followed by a steady decline to near zero by May 1.

Date (approx.)	Number of Cases
March 1	0
March 15	10
March 20	50
March 25	150
March 30	400
April 1	600
April 5	800
April 10	850
April 15	900
April 20	800
April 25	600
April 30	400
May 1	100
