Figure 1 is a line graph illustrating the daily number of COVID-19 cases in the Republic of Serbia from March 1, 2020, to May 1, 2020. The vertical axis (Y-axis) represents the number of cases, with a scale from 0 to 1000. The horizontal axis (X-axis) represents time in days, with major ticks for March 1, April 1, and May 1. The data shows a rapid rise in cases starting in late March, reaching a peak of approximately 900 cases around April 15. Following the peak, there is a significant decline, with cases dropping to near zero by May 1.
