Figure 1 is a line graph illustrating the number of cases of COVID-19 in the Republic of Serbia from March 1, 2020, to May 1, 2020. The Y-axis represents the number of cases, ranging from 0 to 1,000,000. The X-axis represents time in days. The graph shows a sharp increase in cases starting around March 15, peaking at approximately 800,000 cases around March 25, and then a gradual decline towards May 1, 2020.
