Figure 1 is a line graph titled "Number of cases of COVID-19 in the Republic of Serbia". The vertical axis (Y-axis) is labeled "Number of cases" and ranges from 0 to 1000 in increments of 100. The horizontal axis (X-axis) is labeled "Time" and shows dates from March 1, 2020, to May 1, 2020, with major ticks for March 1, April 1, and May 1. The graph displays a single data series representing the daily number of cases. The number of cases starts near zero in early March, begins to rise significantly around March 15, reaches a peak of approximately 900 cases around April 15, and then shows a steady decline, returning to near zero by May 1.
