Figure 1 is a line graph showing the number of cases of COVID-19 in the Republic of Serbia from March 1, 2020, to May 1, 2020. The Y-axis represents the number of cases, ranging from 0 to 1000. The X-axis represents time in days, from March 1 to May 1. The graph shows a sharp increase in cases starting in late March, peaking around April 10 at approximately 900 cases, followed by a decline and then a slight increase towards the end of the period.
