Figure 1 is a line graph illustrating the daily number of COVID-19 cases in the Republic of Serbia from March 1, 2020, to May 1, 2020. The vertical axis (Y-axis) represents the number of cases, ranging from 0 to 1000 in increments of 100. The horizontal axis (X-axis) represents time in days, with labels for March 1, March 15, April 1, April 15, and May 1. The data points are connected by a solid line, showing a significant rise in cases starting in mid-March, peaking at nearly 900 cases in late March, followed by a period of fluctuation and a second peak in mid-April, and finally a decline towards the end of the period shown.

Day	Number of Cases (approximate)
March 1	0
March 15	100
March 25	900
April 1	400
April 10	600
April 15	400
April 25	200
May 1	100
